PROFESSIONAL SUMMARY

Frontend Developer with 6 years of hands-on web development experience building scalable, maintainable web applications with React, TypeScript and Next.js. Currently at Tawuniya, one of Saudi Arabia's leading insurance companies, developing customer-facing and internal platforms used in production. Experienced in reusable component architecture, performance optimization, API integration, accessibility and testing, and in working closely with backend, product, design and QA teams to deliver reliable, high-quality features.

PROFESSIONAL EXPERIENCE

Tawuniya Insurance Company

Jan 2023 – Present

Specialist Platform Developer (Frontend) • Riyadh, Saudi Arabia

- Develop and maintain scalable customer-facing and internal insurance web applications using React, TypeScript and Next.js, with full internationalization (i18n) support.
- Design and build reusable, maintainable UI components shared across multiple forms, flows and applications.
- Translate Figma designs into responsive, pixel-accurate interfaces that work consistently across devices and browsers.
- Integrate RESTful APIs and implement multi-step user flows, including OTP verification, form handling and file uploads.
- Own production support: diagnose and resolve production and environment-specific issues, and optimize rendering and load performance of live applications.
- Write unit and component tests with Jest and React Testing Library to keep features stable as they evolve.
- Review pull requests daily for the frontend team, maintaining coding standards, consistency and code quality.
- Collaborate with backend, product, design and QA teams through structured change-request processes using Git/GitLab.

Key achievements

- Built an in-house web accessibility solution from scratch (contrast modes, text scaling, readable fonts, focus indicators) using React Context, CSS custom properties and analytics tracking, replacing the need for a third-party accessibility plugin.
- Delivered a dynamic, API-driven product comparison experience with optimized mobile behavior, and made it more reliable by replacing brittle hardcoded string matching with normalization-based logic.
- Developed an in-app feedback and bug-reporting tool with screenshot capture and annotation, giving users and QA a faster way to report issues with visual context.

Nawader Group

Dec 2021 – Dec 2022

Frontend Developer

- Owned and maintained the company website and internal admin dashboard end to end using React.
- Shipped new features and improvements on a daily cadence, integrating RESTful APIs with the backend team.
- Built responsive, cross-browser interfaces and handled bug fixes and ongoing maintenance of both platforms.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React, Next.js, Redux Toolkit, React Context API, React Router, Formik

Styling & UI: Material UI (MUI), Tailwind CSS, Sass, CSS Modules, Bootstrap, Responsive Design

Testing: Jest, React Testing Library

Build & Tools: Vite, Figma, Google Tag Manager

APIs & Integration: RESTful APIs, Firebase

Version Control & Collaboration: Git, GitLab, Code Review, Pull Request Workflows

Practices: Component Architecture, Performance Optimization, Web Accessibility, Internationalization (i18n), Cross-Browser Compatibility

LEADERSHIP & MENTORING

- Mentor and onboard frontend developers on the codebase, coding standards and team workflows.
- Prepare and deliver internal technical sessions for the frontend team, including a presentation on the React component lifecycle.

EDUCATION & TRAINING

BSc Computer Science – Kafr El-Sheikh University

2015 – 2019

Faculty of Computers and Information • Grade: Very Good (80%)

- **Graduation Project – Car Rental Web Application:** Built a web application for browsing and renting cars; graded Excellent.

Full Stack Web Development (Python) – Information Technology Institute (ITI)

2020 – Jul 2021

Intensive full-stack training covering frontend and backend web development through hands-on projects

- **E-commerce Store (React, Django, Bootstrap):** Team-built full-stack makeup and perfume store supporting product browsing, buying and selling (mid4night.store).
- **Hajj Greeting Card Generator (React, html2canvas, CSS3):** Bilingual web app for personalizing Hajj greeting cards and downloading them as images.

LANGUAGES

Arabic: Native **English:** Professional working proficiency
